

Sound the Alarm, Save A Life

Installing a smoke alarm could save your life – and that’s just what our volunteers did for residents who signed up to have a free smoke alarm installed.

The American Red Cross has a goal to install 100,000 free smoke alarms in high risk neighborhoods nationwide – and our employees enthusiastically volunteered to do the work. Employees worked in teams of four to perform the tasks of an Installer, Assistant Installer, Documenter and Educator at a Honolulu high rise condominium. This was a very educational day for all of us!
